KOVID-19 NEWS FROM KERALA: ONE PATIENT IS CURED, NO NEW CASE TODAY, TOTAL 95 PATIENTS CONTINUE TREATMENT

Today four new hotspots, a total of 4 hotspots

Thiruvananthapuram, 03 May: In a day of great relief to the state, no recent case of Kovid-19 was confirmed in Kerala today. The Minister of Health and Social Justice of Kerala, Mrs. KK Selja, gave this information in a press release. Meanwhile, another patient has relieved coronavirus infection. A resident of Kasargod, who was undergoing treatment in Kannur district, the results of his test turned negative today. The total number of cured cases in Kerala is 401 and 95 patients are undergoing treatment in various districts of the state.

There are 21,720 persons under surveillance in various districts across the state - 21,332 at their homes and 388 in isolation in hospitals. Today 63 people were hospitalized.

So far, 32,217 samples have been sent for testing and the results of 31,611 samples have not shown any infection. As part of sentinel surveillance, 2,391 samples were collected and tested separately from high-risk groups - health workers, migrant laborers and people with high public contact. Of these, no infection was detected in 1,683 samples.

Four new locations in the state have been declared hotspots today - one each in Wayanad and Idukki districts and two in Ernakulam district. There are a total of 84 hotspots in Kerala at present.
