APPEAL

Following the emergence of the first COVID-19 positive case on 13th April, 2020, the State Government has mandated those citizens who visited Bethany Hospital, Shillong after 24th March, 2020 and Bethany Hospital, Nongpoh after 30th March, 2020 to register (calling 108, 1070 and online registration) and to be under home quarantine. About 5200 citizens have registered with the Government. We are continuously monitoring these individuals through automated calls. Systems for online delivery of essentials have also been put in place and the local community have been urged to support the individuals and families in quarantine. To complement these efforts, the Government has started the distribution of free provision kits to the compulsorily quarantined households.

It has been observed that a large number of registered quarantined individuals are not responding to the automated calls of the Government. Given this, it is hereby requested that registered quarantined individuals should

a) respond to the automated calls and provide information
b) proactively report symptoms (dry cough, fever and difficulty in breathing) by calling 108 so that the Government can reach out to you for testing.
