विषय: – राष्ट्रीय मुख्य स्वास्थ्य कार्यक्रम (एनओएचपी) के अन्तर्गत नौवल कोरोना वायरस (COVID-19) को फैलने से बचाव एवं रोकथाम के संबंध में।

संदर्भ:— 1. चिकित्सा स्वास्थ्य ग्रुप-2 के पत्रांक प.1(1)विस्ता/ग्रुप-2/2020 दिनांक 17 मार्च, 2020
2. भारतीय दन्त विश्वविद्यालय के पत्रांक DE-14-Academic-2019/8855 Dated 17 March, 2020

उपरोक्त विषयांतर्गत लेख है कि विश्व स्वास्थ्य संगठन (WHO) द्वारा कोरोना वायरस (COVID-19) के संक्रमण को महामारी घोषित किया गया है। राष्ट्रीय मुख्य स्वास्थ्य कार्यक्रम (एनओएचपी) के अन्तर्गत उपरोक्त अंतर्गत संदर्भों में दिये गये निर्देशों की पालना में दिनांक 30 मार्च, 2020 तक समस्त आ०टी ए०पी के स्थानीय अधिकारी तथा अधिकारी संगठनों के नौवल कोरोना वायरस (COVID-19) से बचाव एवं रोकथाम के संबंध में अधिक खिलौने निर्देशों की आवश्यकता पालना करवायें।

1. समस्त दन्त चिकित्सकीय प्रक्रिया जिनमें एयरोसोल निकलते हैं (एयरोसोल/अल्ट्रासोनिक स्केलर का इस्तेमाल किया जाता है) का उपयोग कुछ समय के लिए नहीं या कम से कम करना है अथवा केवल आपातकालीन दन्त चिकित्सकीय उपचार किया जाना है।
2. प्रथम रोगी का मेडिकल एवं यात्रा विवरण प्रथम दंत चिकित्सा प्रक्रिया से पूर्व पूरा जाना। इस संदर्भ में भारत सरकार द्वारा जारी समस्त गाइडलाइनों की पालना आवश्यक है।
3. सभी दंत चिकित्सक एवं उनके दस्तावेज एवं पत्रों में वीडियो कार्यक्रम निर्माण रूप से साझा एवं पानी के लिए एवं एक या साथ ही अल्फोहैल युक्त हेद एंड सेटिंग जप का उपयोग प्रथम रोगी को जांच से पूर्व एवं पर्यवेक्षण आवश्यक रूप से करें एवं बाह्य की सज्जीकरण सक्रिय करें एवं डिस्पोजाबल दस्तावेज के प्रयोग को खारिज किया जाना है।
4. चिकित्सकों व सहयोगी स्टाफ को अपने मुह, कान, नाक व चेहरे को छूने से बचना चाहिए।

5. चिकित्सकीय ऑपीडी में आये प्रत्येक स्टेशन के घरों को साफ, हान्ड सेनेटाइजर से साफ करवाये जाये।

6. प्रौद्योगिक व ऑपीडी के दर्शनालय के हेंडल को अल्कोहल वाला डिस्संक्टर द्वारा किटामगुल्त किया जाये साथ-साथ हेंडल चॉर्स के अन्य साथियों को दिन में कई बार अल्कोहल वाला डिस्संक्टर द्वारा किटामगुल्त किया जाये।

7. रोगी के मुख की बाहर से आइसो यूपाइल अल्कोहल द्वारा स्वच्छ किया जाये।

8. दूर चिकित्सा प्रक्रिया से पूर्व प्रौद्योगिकी आयोजन से कुल्ला करवाया जाये।

9. सभी दूर चिकित्सा एवं उनके सहयोगी कर्मचारियों के द्वारा एन–95 अथवा लीन पर्स मास्क, हेंड कंप, अदाल्ट ग्लासेस एवं फेस मास्क का प्रयोग किया जाये।

10. निर्धारित समय अतिरिक्त से डेंटल विलिका का प्रयोग नहीं किया जाये।

11. दूर चिकित्सा ऑपीडी के बाहर कोरोना वायरस से बचने से साम्यता अण्डेसी का प्रदर्शन किया जाये।

संलग्न: उपरोक्तानुसार।

DENTAL COUNCIL OF INDIA
(A STATUTORY BODY CONSTITUTED UNDER THE DENTISTS ACT, 1948)

Speed Post - Email
Circular

No.DE-14-Academic-2019/B 8 5 5

Dated the 17 March, 2020

To

The Principal/Deans of all the Dental Colleges in India

Sub: Precautionary and preventive measures to prevent spreading of Novel Coronavirus (COVID-19) - Regarding

Sir / Madam,

The Dental Council of India, in addition to the advisory issued by Ministry of Health & Family Welfare, Govt. of India/State Government/UGC (copy attached), in order to combat the threat of Coronavirus (COVID-19), has also decided to issue this advisory to all the Dental Colleges of the Country to take the following necessary precautions and preventive measures.

1. All the faculty and students of the dental colleges shall avoid their Biometric Attendance till 31.3.2020 and mark their attendance in the attendance register only.

2. The classes of first year to fourth year BDS Course at all the Dental Colleges of the Country shall remain suspended till 31.3.2020 and this period of vacation shall be compensated either from the summer vacation or from any other vacation as the concerned affiliated university may decide in this regard.

3. In wake of COVID-19 outbreak going on in the country, the Dental Colleges shall not hold any seminars, workshops, conferences, camps etc.

4. All the Dental Colleges shall strictly comply with all the advisory issued by Central Government/State Government and UGC from time to time including universal precautions for infection control.

5. Clinical procedures involving aerosol generation (Air rotor/Ultrasonic Scalers) to be avoided/minimized for the time being and only emergency procedures to be performed.

6. A copy of interim guidance dated 25th January, 2020 issued by WHO on Infection prevention and control during health care when novel coronavirus (nCoV) infection is suspected, is attached herewith for ready reference and for strict compliance.

Recommendations for safe clinical practice in dental clinics/hospitals in view of the Covid-19 outbreak, are as under:

a) All dentists and support staff should wash their hand thoroughly with soap and water and follow up with alcohol based hand sanitizers before and after every patient. Surgical scrubbing of hands is recommended. Disposal gloves to be used routinely as usual.

b) Staff and doctors should avoid touching their face specially the ear, nose and mouth.

c) Every patient who enters and exits the clinic should be provided hand sanitizers.

d) The waiting room/clinic including the handles and doors as well as dental chairs and other surfaces should be wiped several times in a day with alcohol based disinfectant.

e) Thorough Medical & Travel history of each Patient should be recorded before any clinical procedures.

f) Patients should be scrubbed with iso Propyl alcohol extra orally.

g) Pre-procedural rinse with Povidone Iodine is recommended.

h) Wearing of N95 or atleast 3 ply masks and suitable head caps, productive eye wear and face shield is recommended.

i) Fumigation of clinics periodically is advised.

(Dr. Sabyasachi Saha)
Secretary
Dental Council of India

Copy to:
The Secretary to the Govt. of India, Ministry of Health & Family Welfare, Department of Health (DE Section), Maulana Azad Road, Nirman Bhawan, New Delhi-110011 - for information.

(Dr. Sabyasachi Saha)
Secretary
Dental Council of India

C.C.: 1. 2. 3. Server Section - for uploading on website
D.O. No.F.No.1-14/2020 (Website) 5th March, 2020

Dear Madam/Sir,

This is in reference to communications received from Secretary, Department of Health and Family Welfare and Joint Secretary (HEA), MHRD regarding taking preventive measures to combat the threat of the Novel Coronavirus (COVID-19), as some cases of the virus have been reported in the country. Towards this, a coordinated and collective effort in a mission mode is needed, therefore all universities and their affiliated colleges are requested to take necessary precautions and follow the advisory given below to help in prevention/reduction of the transmission of the virus.

Advisory for Universities and Colleges – Novel Coronavirus (COVID19)

Universities and Colleges are advised to:

- Avoid large gatherings on campus.
- Any student/staff with travel history to any COVID-19 affected country or in contact with such persons in last 28 days, should be monitored and home quarantined for 14 days.
- Faculty should be alert towards any student with signs and symptoms i.e. fever, cough and difficulty in breathing, and should immediately have the student tested.
- Till advised by the treating doctor the student should not join campus.
- Faculty staff and students should also be advised about simple public health measures of hand and respiratory hygiene.

Hand hygiene: Wash hands frequently and thoroughly with soap & water or use alcohol based hand sanitizer, even when hands are visibly clean.

Respiratory hygiene:
1. Everyone should cover their mouth with a tissue/handkerchief (or their sleeve if there are no tissues available) when they cough or sneeze and wash their hands afterwards.
2. Do not touch your eyes, nose and mouth.
3. Everyone should throw away used tissues in a bin and wash their hands after contact with coughing/sneezing.

- Frequently touched surfaces – door knobs, switches, desk tops, hand railings etc. should be disinfected
- Provide alcohol based hand cleaners/sanitizers in frequented spots of the universities/colleges
- Ensure availability of soap and water in rest rooms at all times
- Foot operated pedal bins lined with plastic bag should be provided in each classroom & rest room
- In hostels, health status of students as well as the other ancillary staff should be monitored on regular basis. In case, there are suspected cases, the authorized local medical authority should be called for examination.

Anybody with signs & symptoms (cough, fever or difficulty in breathing) should call State UT helpline number or Ministry of Health & Family Welfare’s 24X7 helpline at 011-23975046 or visit public health facility with a mask or mouth covered.

An information pamphlet received from the Ministry of Health & Family Welfare to sensitise the students is enclosed.

With regards,

Yours sincerely,

(Rajnish Jain)

End: As above

The Vice-Chancellors of all Universities
Reduce the risk of Coronavirus infection
Follow these important precautions

1. Avoid travel if you are suffering from fever and cough
2. Wash your hands frequently with soap and water
3. Share your travel history with your health worker (ASHA/ANM)

Stay safe from Coronavirus!

If you have cough, fever or difficulty in breathing, contact a doctor immediately

24X7: +91-11-23978046
or email at ncov2019@gmail.com
Reduce the risk of Coronavirus infection

Follow these important precautions

1. Remember to wash hands with soap frequently after coughing and sneezing.

2. Clean your hands before and after caring for sick person.

3. Before cooking, after cooking and before eating food.

4. After using toilet.

Stay safe from Coronavirus!

If you have cough, fever or difficulty in breathing, contact a doctor immediately.

Stay protected!

Infection prevention and control during health care when novel coronavirus (nCoV) infection is suspected

Interim guidance
25 January 2020

World Health Organization

Introduction
This is the first edition of guidance on infection prevention and control (IPC) strategies for use when infection with a novel coronavirus (2019-nCoV) is suspected. It has been adapted from WHO's Infection prevention and control during health care for probable or confirmed cases of Middle East respiratory syndrome coronavirus (MERS-CoV) infection, based on current knowledge of the situation in China and other countries where cases were identified and experiences with severe acute respiratory syndrome (SARS-CoV) and MERS-CoV. WHO will update these recommendations as new information becomes available.

This guidance is intended for healthcare workers (HCWs), healthcare managers and IPC teams at the facility level but it is also relevant for the national and district/provincial level. Full guidelines are available from WHO.

Principles of IPC strategies associated with health care for suspected nCoV infection
To achieve the highest level of effectiveness in the response to an 2019-nCoV outbreak using the strategies and practices recommended in this document, an IPC programme with a dedicated and trained team or at least an IPC focal point should be in place and supported by the national and facility senior management. In countries where IPC is limited or nonexistent, it is critical to start by ensuring that at least minimum requirements for IPC are in place as soon as possible, both at the national and facility level, and to gradually progress to the full achievement of all requirements of the IPC core components according to local priority plans.

IPC strategies to prevent or limit transmission in healthcare settings include the following:
1. ensuring triage, early recognition, and source control (isolating patients with suspected nCoV infection);
2. applying standard precautions for all patients;
3. implementing airborne precautions (droplet and contact and, whenever applicable, airborne precautions) for suspected cases of nCoV infection;
4. implementing administrative controls;
5. using environmental and engineering controls.

Clinical triage includes a system for assessing all patients at admission allowing early recognition of possible 2019-nCoV infection and immediate isolation of patients with suspected nCoV infection in an area separate from other patients (source control). To facilitate the early identification of cases of suspected nCoV infection, healthcare facilities should:
- encourage HCWs to have a high level of clinical suspicion;
- establish a well-equipped triage station at the entrance of health care facility, supported by trained staff;
- institute the use of screening questionnaires according to the updated case definition (https://www.who.int/publications-detail/global-surveillance-for-human-infection-with-novel-coronavirus-2019-ncov) and
- post signs in public areas reminding symptomatic patients to alert HCWs.

The promotion of hand hygiene and respiratory hygiene are essential preventive measures.

2. Applying standard precautions for all patients

Standard precautions include hand and respiratory hygiene, the use of appropriate personal protective equipment (PPE) according to risk assessment, infection safety practices, waste management, proper linens, environmental cleaning and sterilization of patient-care equipment.

Ensure that the following respiratory hygiene measures are used:
- ensure that all patients cover their nose and mouth with a tissue or elbow when coughing or sneezing;
- offer a medical mask to patients with suspected 2019-nCoV infection while they are in waiting/public areas or in cohorting rooms;
- perform hand hygiene after contact with respiratory secretions.

HCWs should apply the WHO's My 5 Moments for Hand Hygiene approach before touching a patient, before any clean or aseptic procedure is performed, after exposure to body fluid, after touching a patient's surroundings.
- hand hygiene includes either cleansing hands with an alcohol-based hand rub (ABHR) or with soap and water;
- alcohol-based hand rubs are preferred if hands are not visibly soiled;
- wash hands with soap and water when they are visibly soiled.
The rational, correct, and consistent use of PPE also helps to reduce the spread of pathogens. The use of PPE effectiveness strongly depends on adequate and regular supplies, adequate staff training, appropriate hand hygiene and specifically appropriate human behaviour.\textsuperscript{2,5,6}

It is important to ensure that environmental cleaning and disinfection procedures are followed consistently and correctly. Thoroughly cleaning environmental surfaces with water and detergent and applying commonly used hospital-level disinfectants (such as sodium hypochlorite) are effective and sufficient procedures.\textsuperscript{7} Medical devices and equipment, laundry, food service utensils and medical waste should be managed in accordance with safe routine procedures.\textsuperscript{2,8}

3. Implementing empiric additional precautions

3.1 Contact and droplet precautions

- In addition to using standard precautions, all individuals, including family members, visitors and HCWs, should use contact and droplet precautions before entering the room where suspected or confirmed nCoV patients are admitted.
- Patients should be placed in adequately ventilated single rooms. For general ward rooms with natural ventilation, adequate ventilation is considered to be 60 L/s per patient;\textsuperscript{9}
- When single rooms are not available, patients suspected of being infected with nCoV should be grouped together;
- All patients' beds should be placed at least 1 m apart regardless of whether they are suspected to have nCoV infection;
- Where possible, a team of HCWs should be designated to care exclusively for suspected or confirmed cases to reduce the risk of transmission;
- HCWs should use a medical mask (for specifications, please see references 2);\textsuperscript{10}
- HCWs should wear eye protection (goggles) or facial protection (face shield) to avoid contamination of mucous membranes;
- HCWs should wear a clean, non-sterile, long-sleeved gown;
- HCWs should also use gloves;
- The use of boots, coveralls and apron is not required during routine care;
- After patient care, appropriate-doffing and disposal of all PPE's and hand hygiene should be carried out.\textsuperscript{2,6} Also, a new set of PPE's is needed, when care is given to a different patient;
- Equipment should be either single-use and disposable or dedicated equipment (e.g., endoscopes, blood pressure cuffs and thermometers). If equipment needs to be shared among patients, clean and disinfect it between use for each individual patient (e.g., by using ethyl alcohol 70%);\textsuperscript{9}
- HCWs should refrain from touching eyes, nose or mouth with potentially contaminated gloved or bare hands;
- Avoid moving and transporting patients out of their room or area unless medically necessary. Use designated portable X-ray equipment and/or other designated diagnostic equipment. If transport is required, use predetermined transport routes to minimize exposure for staff, other patients and visitors, and have the patient using a medical mask;
- Ensure that HCWs who are transporting patients perform hand hygiene and wear appropriate PPE as described in this section;
- Notify the area receiving the patient of any necessary precautions as early as possible before the patient's arrival;
- Routinely clean and disinfect surfaces which the patient is in contact;
- Limit the number of HCWs, family members and visitors who are in contact with a suspected and confirmed 2019-nCoV patient;
- Maintain a record of all persons entering the patient's room, including all staff and visitors.

3.2 Airborne precautions for aerosol-generating procedures

Some aerosol-generating procedures have been associated with an increased risk of transmission of coronaviruses (SARS-CoV and MERS-CoV), such as tracheal intubation, non-invasive ventilation, tracheostomy, cardiopulmonary resuscitation, manual ventilation before intubation, and bronchoscopy.\textsuperscript{10,11} Ensure that HCWs performing aerosol-generating procedures:

- Perform procedures in an adequately ventilated room that is natural ventilation with air flow of at least 160 L/s per patient or in a negative pressure room with at least 12 air changes per hour and controlled direction of air flow when using mechanical ventilation;\textsuperscript{12}
- Use a particulate respirator at least as protective as a US National Institute for Occupational Safety and Health (NIOSH)-certified N95 European Union (EU) standard FFP2, or equivalent.\textsuperscript{12,13} When HCWs put on a disposable particulate respirator, they must always perform the seal check.\textsuperscript{13} Note that if the wearer has facial hair (i.e., a beard) it may prevent a proper respirator fit;\textsuperscript{13}
- Use eye protection (i.e., goggles or a face shield);
- Wear a clean, non-sterile, long-sleeved gown and gloves. If gowns are not fluid resistant, HCWs should use a waterproof apron for procedures expected to have high volumes of fluid that might penetrate the gown;\textsuperscript{12}

\textsuperscript{10} Medical masks are surgical or procedure masks that are flat or pleated (some are like cubs); they are affixed to the head with straps\textsuperscript{9}
Infection prevention and control during health care when novel coronavirus (nCoV) infection is suspected in patient's care and support:

- Limit the number of persons present in the room to the absolute minimum required for the patient's care and support.

4. Implementing administrative controls

Administrative controls\(^2\) and policies for the prevention and control of transmission of 2019-nCoV infections within the healthcare setting include, but may not be limited to: establishing sustainable IPC infrastructures and activities; educating patients, caregivers, and developing policies on the early recognition of acute respiratory infection potentially caused by 2019-nCoV, ensuring access to prompt laboratory testing for identification of the etiologic agent; preventing overcrowding, especially in the emergency department; providing dedicated waiting areas for symptomatic patients; appropriately isolating hospitalized patients; ensuring adequate supplies of PPE; and adherence to IPC policies and procedures for all facets of health care.

4.1. Administrative measures related to healthcare workers

- Provision of adequate training for HCWs.
- Ensuring an adequate patient-to-staff ratio.
- Establishing a surveillance process for acute respiratory infections potentially caused by nCoV among HCWs.
- Ensuring that HCWs and the public understand the importance of promptly seeking medical care.
- Monitoring HCW compliance with standard precautions and providing mechanisms for improvement as needed.

5. Using environmental and engineering controls

These controls address the basic infrastructure of the health care facility.\(^3\) These controls aim to ensure there is adequate ventilation\(^7\) in all areas of the healthcare facility, as well as adequate environmental cleaning.

Additionally, spatial separation of at least 1 meter should be maintained between all patients. Both spatial separation and adequate ventilation can help reduce the spread of many pathogens in the healthcare setting.\(^14\)

Ensure that cleaning and disinfection procedures are followed consistently and correctly.\(^6\) Cleaning environmental surfaces with water and detergent and applying commonly used hospital disinfectants (such as sodium hypochlorite) is an effective and sufficient procedure.\(^1\) Manage laundry, food service utensils, and medical waste in accordance with safe routine procedures.

Duration of contact and droplet precautions for patients with nCoV infection

Standard precautions should be applied at all times. Additional contact and droplet precautions should continue until the patient is asymptomatic. More comprehensive information about the mode of 2019-nCoV infection transmission is required to define the duration of additional precautions.

Collecting and handling laboratory specimens from patients with suspected 2019-nCoV infection

All specimens collected for laboratory investigations should be regarded as potentially infectious. HCWs who collect, handle, or transport any clinical specimens should adhere rigorously to the following standard precaution measures and biosafety practices to minimize the possibility of exposure to pathogens.\(^1\)\(^3\)\(^5\)\(^6\)

- Ensure that HCWs who collect specimens use appropriate PPE (e.g., eye protection, a medical mask, a long-sleeved gown, gloves). If the specimen is collected with an aerosol-generating procedure, personnel should wear a particulate respirator at least as protective as a NIOSH-certified N95, an EU standard FFP2, or the equivalent.
- Ensure that all personnel who transport specimens are trained in safe handling procedures and spill decontamination procedures.
- Place specimens for transport in leak-proof specimen bags (i.e., secondary containers) that have a separate scalable pocket for the specimen (e.g., a plastic bihazard specimen bag), with the patient’s label on the specimen container (i.e., the primary container), and a clearly written laboratory request form.
- Ensure that laboratories in health care facilities adhere to appropriate biosafety practices and transport requirements, according to the type of organism being handled.
- Deliver all specimens by hand whenever possible. DO NOT use pneumatic-tube systems to transport specimens.
- Document clearly each patient’s full name, date of birth and suspected nCoV of potential concern on the laboratory request form. Notify the laboratory as soon as possible that the specimen is being transported.

Recommendation for outpatient care

The basic principles of IPC and standard precautions should be applied in all health care facilities, including outpatient care and primary care. For 2019-nCoV infection, the following measures should be adopted:

- Triage and early recognition
- Emphasis on hand hygiene, respiratory hygiene and medical masks to be used by patients with respiratory symptoms
- Appropriate use of contact and droplet precautions for all suspected cases
- Prioritization of care of symptomatic patients
- When symptomatic patients are required to wait, ensure they have a separate waiting area
- Educate patients and families about the early recognition of symptoms, basic precautions to be used and which health care facility they should refer to.

Acknowledgements
The original version of the MERS-CoV IPC guidance was developed in consultation with WHO's Global Infection Prevention and Control Network and Emerging Diseases Clinical Assessment and Response Network, and other international experts. WHO thanks those who were involved in developing and updating the IPC documents for MERS-CoV.

This document was developed in consultation with the WHO Global Infection Prevention and Control Network and other international experts. WHO thanks the following individuals for providing review (in alphabetical order):

चिकित्सा एवं स्वास्थ्य विभाग

कमांड प: 1(1)विश्वा / युप-2 / 2020

जयपुर, दिनांक : 17.03.2020

कोरोना संक्रमण (COVID-19) की रोकथाम ही इस बीमारी से बचाव का सबसे महत्वपूर्ण उपाय है। इस हेतु यह आवश्यक है कि लोग आपस में मिलते समय सुरक्षित दूरी रखें व यथासंभव भीतर ही वाले स्थानों पर जाने से बचें। इसके द्वारा जो लोग बीमारी से संक्रमित है तथा जो बीमारी से संक्रमित नहीं है उनमें मध्य बीमारी फैलने की दर को कम किया जा सकता है अथवा रोका जा सकता है। साथ ही मिलते समय आपस में दूरी बनाने रखने के माध्यम से मृत्यु (Mortality) को कम किया जा सकता है, अथवा रोका जा सकता है। इस हेतु COVID-19 बीमारी के फैलने की रोकथाम के लिए विभाग द्वारा निम्नलिखित एडवायर्जरी जारी की जाती हैः-

1. आपस में मिलते समय हाथ मिलाना तथा गले लगने जैसे अभियांत्रिकी से बचे, स्वच्छता तथा सुरक्षित शारीरिक दूरी बनाने रखें।

2. कोरोना वायरस (COVID-19) के संक्रमण की रोकथाम एवं बचाव हेतु प्रदेश के समस्त सार्वजनिक स्थानों (यथा परिसर स्थल, संग्रहालय, ऐतिहासिक स्मारक, किले, हट्टे, पार्क, स्वच्छन्द, सिक्के, स्थान, स्थापत्य, एवं सार्वजनिक स्थान, हॉटेल, पौड, सांस्कृतिक एवं सामाजिक केंद्र आदि) पर 50 से अधिक लोग एकत्र न हो। इस हेतु आवश्यक आदेश जारी कर दिये गये है।

3. प्रदेश में सभी शिक्षा संस्थान दिनांक 30 मार्च, 2020 तक बंद कर दिये गये है।

4. लिंग संरचनाओं में बीमार एवं बालक परिवार का आयोजन किया जा रहा है, उनमें छात्रों के मध्य एक मीटर/सुरक्षित दूरी सुनिश्चित करने के बाद ही परिवार आयोजित की जाए।

5. निजी क्षेत्र के संगठन/नियोजक कम्पनियों को यथा संभव घर से कार्य करने की अनुमति प्रदान करें।

6. बैठने का आयोजन यथा संभव वीडियो कॉन्फ्रेंस के माध्यम से किया जाए। साथ ही ऐसे बैठने जिनमें बड़ी संख्या में अन्य शामिल हों, ऐसी बैठने को यथा संभव पुर्यावधारित करें।

7. रेस्टोरेंट आधार होटल/दादाजी के प्रांत के वारांक यह सुनिश्चित करने के बाद-बाद तो वाली स्थानों की सफाई तथा हेड वॉश प्रोटोकॉल का पालन हो। साथ ही दो टिल्स के मध्य कम से कम एक टिल्स दूरी/सुरक्षित दूरी का फास्ट फॉर्म रखें एवं यात्रियों को यथा संभव खुदी हवा में बैठने के लिए प्रोत्साहित करें।

8. आयुक्त पूर्व नियोजित शादियाँ एवं समारोह की संख्या यथासंभव सीमित रखें।

9. सभी आयोजक गैर आवश्यक सांस्कृतिक तथा सामाजिक समारोह को यथा संभव सीमित रखें।
10. स्थानीय अधिकारियों द्वारा खेल आयोजन तथा प्रतियोगिताओं के आयोजन से संपर्क एवं सवाद स्थापित कर ऐसो होने वाले कार्यक्रमों को यथा संभव स्थापित करने हेतु अनुरोध किया जाए।

11. स्थानीय निकायों के चुने हुये जननितिविधि/अधिकारियों के द्वारा यथायोग्य संचार तथा अन्य संगठनों के साथ संवाद स्थापित कर व्यवसायिक स्तर यथा सब्जी मार्केट, अन्य बाजारों में व्यवसायिक रूप से काम करना तथा काम करने का अभ्यास चलाया जाये, साथ ही यथा संयोजन इतना कार्य समय सीमित करें। बाजारों में अधिक भीड़ न हो। इसे हेतु उपयोग किये जाये।

12. आयोजन गैर जलवायु यात्राओं से व्यवहार एवं सार्वजनिक परिवहन यथा बस, रेलगाड़ी, हवाई जहाज में सुरक्षित दृष्टि बनाना योग्य करें। साथ ही संबंधित अधिकारी इनकी सत्यता की नियमित तथा उचित रूप से विस्तारित (Disinfect) करने का सुनिश्चित करें।

13. समस्त विभिन्न वयस्कों द्वारा कोरोना वायरस से संबंधित समस्त प्रोटोकॉल का पालन किया जाता है एवं मरीजों से मिलने वाले परियोजना, निति एवं बच्चों को प्रतिबंधित किया जाता है।

14. औज़ाराईन सेवा प्रदाता कंपनियाँ ने होम डिलीवरी का कार्य करने वाले पुरुषों और महिलाओं के लिए विशेष रूप से सुखालामक उपाय अपनाएँ जाते है।

15. नोटों एवं पत्रकारिता के पूर्व पत्रकारिता के लिए पानी के सप्ताह का उपयोग किया जाता है तथा इसे दैनिक रूप से विस्तारित किया जाता है।

16. सभी निदेश क्षेत्र के कार्यालय / विभिन्न स्थानों में व्यापक रूप से संबंधित प्रतिष्ठित शीर्ष की जाता है।

प्रतिष्ठित निन्दा को सूचनार्थ एवं आयोजनीय कार्यवाही हेतु प्रस्तुत है—

1. निदेश सचिव, मा. गुजराती मंत्री महोदय।
2. निदेश सचिव, मा. गुजरात सचिव महोदय।
