Sikkim reports its first case of COVID-19.

Here is what you need to know:

- Sikkim reports first COVID-19 positive case.
- The person was in Quarantine Facility hence no fear of community transmission/spread.
- Currently, the patient is receiving proper treatment at STNM Hospital.
- Contact tracing is in progress and all those who have come in contact with the person are also being tested thereby containing any possible spread of COVID-19.

Do not panic and support the frontline workers and the State Government towards combating COVID-19.
