COVID-19 fighter Vandana Tiwari died due to brain haemorrhage in MP, not due to an attack by Muslims in UP

April 10, 2020

An image of a woman lying on a hospital bed is being shared with the claim that Dr. Vandana Tiwari has died in the attacks of Muslims in UP when she went to screen them for COVID-19. ‘FACTLY’ has found that Vandana Tiwari, a pharmacist in Madhya Pradesh who had been working against the spread of COVID-19 in the state, had died due to brain haemorrhage. So, the claim that she had died in the attacks of Muslims in UP when she went to screen them for COVID-19 is false.
The quarantine center seen in the video is not Kanipakam ‘temple’, it’s a ‘pilgrim lodge’ in Kanipakam.
