1,814 fresh cases take Uttar Pradesh’s Covid-19 tally to 4,72,075; death toll rises to 6,902

LUCKNOW:
On Sunday, over 1.12 lakh tests for the detection of Covid-19 were done across Uttar Pradesh, leading to the detection of 1,814 fresh cases and 21 deaths, the state health department said.

Amit Mohan Prasad, the additional chief secretary of the health department, said that with the fresh cases detected, the state’s Covid-19 tally has reached 4,72,075 while the death toll has risen to 6,902.

The fatality rate was 1.46 per cent, he said, adding the number of active cases in the state has come down to 26,652 while the recovery rate has gone up to 92.89 per cent.

Prasad said that there is no second wave like being seen in many countries.

The number of active cases in the state has come down to 26,652 while the death toll rose to 6,902 with 21 more people succumbing to the disease during the same period, officials said.

With this, the recovery rate has gone up to 92.89 per cent while the fatality rate was 1.46 per cent, he said, adding the number of active
