Brochure:

The paradigm shift in approach towards management of disasters accentuates the need for risk reduction at the community level in India. It focuses on developing the capacity and skills of the community so that they can deal with the disasters as a way of life. In the recent years, a number of initiatives have taken place for reducing the risks of disasters at the community level, which have assumed the nomenclature of 'Community Based Disaster Risk Management (CBDRM)'. Making a village disaster management plan is a vital and indispensable component of CBDRM. The CBDRM approach provides opportunities for the local community to evaluate their own situation based on their own experiences initially. Under this approach, the local community not only becomes part of creating plans and decisions, but also becomes a major player in its implementation.

The rationale for involving communities in disaster preparedness and mitigation activities is based on the assumption that community is the real sufferer and the first responder and it has developed its own coping mechanisms and strategy to reduce the impact of disasters. It is imperative to appreciate this local knowledge and resources, and to build on them in order to improve the capacity of the people to withstand the impact of disasters. Moreover, ownership of disaster reduction should not be stripped from local people who would be left even more powerless in case external intervention does not occur. In fact building community leadership and a chain of trained community cadres through participatory approach can help harness the resilience and resourcefulness of the community to cope up with exigencies. Involvement and participation of the communities will ensure a collective and coordinated action during emergencies.

Hence, disaster reduction activities should be based on participatory approaches involving local communities as much as possible, considering them as proactive stakeholders and not passive targets for intervention. Furthermore it is not only the "big" disasters that destroy life and livelihoods, accumulated losses from small floods, droughts and landslides can exceed the losses in comparison to the bigger ones and contribute significantly to increased vulnerability at the local level. These disasters attract little media attention and communities are often left on their own to cope with the destruction. This provides another reason to invest in Community Based Disaster Risk Management. Village Disaster Management Plan (VDMP) / Community Contingency Plan (CCP) is a document prepared by the community themselves for their own disaster management based on their own Hazard, Vulnerability, Risk, Resource & Capacity analysis, containing village profile supported by maps, emergency response & disaster risk reduction plans, listing out activities & pin pointing responsibility of the VDMC (Village Disaster Management Committee), SHG (Small Household Group), TF - Task Force Members & the community at normal times, before, during & after a disaster in order to save lives, livelihood & property & integrating it into the long term sustainable village developmental plan. All the activities in the emergency response plan are so well planned, practiced, rehearsed & synchronized that they take place simultaneously in clockwork precision with minimum loss of time & orders.

Realizing the pivotal role played by the community, the National Institute of Disaster Management has developed a training module on "Village Disaster Management Plan" (VDMP). This module aims to develop the capacity and skill of the community

Stay Protected from Corona

NO CARELESSNESS
UNTIL THERE IS A CURE

to make and implement plans at the local level for mitigating the impact of hazards and preventing them from becoming disasters. People working in the field of disaster management can use this module and development issues to guide the community to prepare and implement a village disaster management plan.

ABOUT THE COURSE

Course Title: Training Programme on Preparation of Village Disaster Management Plan
The objectives of the Programme are as follows:

- To explain the concept of village disaster management plan,
- To describe the process of development of village level disaster management plan,
- To describe the main components of the plan,
- To highlight the Standard Operating Procedure for Disaster Management Committees and Disaster Management Teams in various phases of disasters, and;
- To describe the process of updating of the plan.

Course Contents:

The contents of the course would touch upon the following aspects, to achieve the objectives:

- Basic Concepts of Disaster Management- Paradigm shift in DM to DRR
- Linkages between disasters, climate change, environment and sustainable development
- Institutional Framework for disaster management in the country
- Hazard, Risk, Vulnerability & Capacity (HRVC) Analysis- Concept, Tools and Techniques:
- Group Exercise
- Village Disaster Management Plan : Need, Framework and Process
- Group Exercise: Standard Operating procedures of DMC and DMTs in Pre and Post
- Disaster Phase
- Field Visit: Group presentation
- Psychosocial Counseling in Disasters
- Financial mechanism for VDMP : Linking it with Development Schemes
- Mock Drill, Contact Details and updating mechanism
- Components of Family Disaster Management Plan

Target Group:

- The course is designed for Members of the District Disaster Management Authorities/Committee,
- Middle level officers from department of Revenue, Relief, Disaster Management, ULB, PWD,
- Block Development Officers, Zilla Parishad, Police, Fire, Agriculture, State Department of
- Irrigation and Flood Control, Health Department, NGOs, CBOs etc.

Speakers of the session:

Day 1:

- Dr. Sushma Guleria, NIDM, Basic Concepts of Disaster Management & Institutional Framework: DRR overview, the highlights of the presentation were:
 - Strengthen the capacity of the disaster prone communities
 - Address hazard threats through mitigation measures
 - Pre/During/Post disaster roles of PRI members

- Shri. Shekher Chaturvedi, NIDM, Institutional Framework: Disaster Risk Reduction Overview: the highlights of the presentation were:
 - Convergence of ministry/department (gram panchayat disaster management committee)
 - Why we need local planning?
 - Constitutional provision, authority and responsibilities of Panchayats.

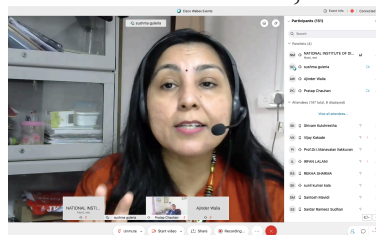

DAY 2:

- Dr. Ajinder Walia (NIDM) Village Disaster Management Plan: Need, Framework and Process, the highlights of the presentation were:
 - Steps in making VDMP
 - Framework for VDMP
 - Roles and responsibilities of the concerned officials and teams in the wake of a disaster.

- Dr. Sushma Guleria, NIDM, Preparation of Family Disaster Management Plan Preparedness and Mitigation Plan.
 - Standard Operating procedures of DMC and DMTs in Pre Disaster Phase, Response Plan: DMC and DMTs.
 - Efficient use of your mitigation resources, it is not enough to know if, when, or even where a hazard event will strike

Stay Protected from Corona

NO CARELESSNESS
UNTIL THERE IS A CURE

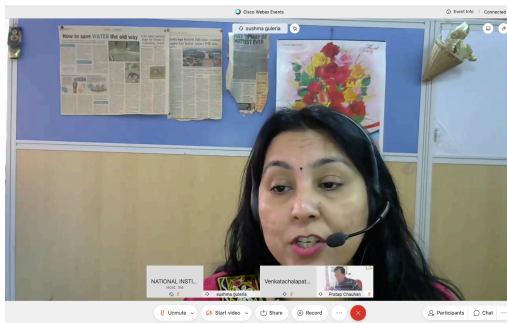

DAY3:

➤ Dr. Suresh Babu, Associate Prof., NIRD&PR, Guwahati, Integration of DM Plan into Gram Panchayat Development Plans (GPDP), the highlights of the presentation were

- Discussion on level of Institutional Planning
- Participatory steps for GPDP.
- Challenges of Materializing the vision of GPDP

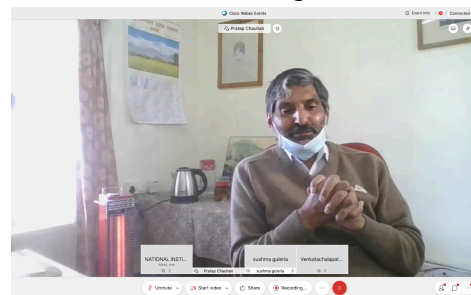

➤ Dr. Sushma Guleria, NIDM, Mock Drill: Basic Concept Contact Details and updating mechanism, the highlights of the presentation were:

- Maintain account and inventory of Disaster Management Committees (DMCs)
- Mock drill for evacuation
- Mapping of the more vulnerable groups like women, Children, aged, people with critical disabilities

➤ Mr. Vinod Gupta (Core Faculty) gave lecture on Financial provisions and Rural Schemes in Himachal Pradesh

Major Takeaways:

- Disasters seem to be a norm today, all set to increase in the coming years. Nature's fury, human mistakes, coupled with a growth in population and insufficient enforcement of building codes in high-risk zones, has not only enhanced people's vulnerability towards these disasters but also created new challenges to risk management.
- It's been over a decade since the Disaster Management Act of 2005 was passed, but the moot question still persists: Are we able to manage risks? How resilient are we at the village level today?
- Establishment of intra-departmental communication and coordination, and the valuable partnerships and community trust built prior to, and following the disaster. All this ensured a smooth, successful disaster mitigation and management plan at village level.
- It is the community that is the first line of defense in preparing or responding to a disaster. The formulation of village disaster management plan (Village Disaster Management Plan) thus becomes an important ingredient in implementing community based disaster risk management process.
- VDMP refers to a list of activities a village agrees to follow to prevent loss of life, livelihood and property in case of a disaster. Since the enactment of DM Act, 2005 followed by the National Disaster Management Policy, formulated in 2009 by National Disaster Management Authority (NDMA), a paradigm shift in planning has taken place. From a relief-driven response to more pro-active approach, initiatives have taken place for reducing the risks of disaster at the community level.
- Gaps at the sub-national level regarding the understanding of vulnerabilities and capacities of common people, vertical and horizontal coordination among institutions, intra departmental communication and the most important- building the trust and skill of the community to make decisions in a compressed time frame of emergency and recovery phases.
- The aim of a VDMP is to build the capacity and the resilience of the community and to equip them with skills so that management of various hazards becomes a way of life for them. It engages the community and provides an opportunity to the local people to evaluate their own situation based on their experiences.
- The participation & interaction of people during the planning process also improves the capacity of local people to understand the causal factors behind their vulnerabilities. This helps them take collective decision and confers a sense of ownership that helps withstand the impacts of any disaster

sdsouna@gmail.com	Very Good	Yes		Very Good	This training programme is very beneficial to us as this training has taught us the key points to tackle the disasters and its impacts in the livelihoods. Disasters can be managed by proper planning and with good will power and patience.	There were noise in the background due to which the speaker's voice was not audible So the suggestion is to minimise background noise as it causes distractions. Overall everything was well managed. Please share notes with us.
vsingh3@amity.edu	Very Good	Yes	Informative	Very Good	Use practical example in teaching	Thanks
nagarajan22563@gmail.com	Very Good	Yes	Need of local planning , need based planning, Vision planning	Very Good	I can share when I take classes at RIRDPR	Kindly share PP presentations and materials to All participants for Remembering and Refreshing
sevathanc@gmail.com	Very Good	Yes	VP DMP is one of the main components in the disaster management.	Very Good	I am the Rural Development Expert in TNSDMA so I will use this learning to my work.	Nothing
vsingh3@amity.edu	Very Good	Yes	Informative	Very Good	in teaching	Thanks
drdineshphe@gmail.com	Very Good	Yes	All aspects of village level planning were tough and related field experiences were also shared fully.	Very Good	During student teaching and self use	Related Handouts/ guidelines may be shared

UNTIL THERE IS A CURE

			for disasters and also could accordingly prepare disaster management plans at village/panchayat level.		and other related programmes.	as there happen some technical hiccups during the course of training.
deepeesharma81@gmail.com	Excellent	Yes	Program made me aware about DM concept, it's team, constitution, how to access hazard, vulnerability, danger n risk, how to make DMP, hazard mapping , seasonal calendar disaster management team, pre n post disaster management steps, and convergence of DM concept with all development scheme, GPDP etc. Before this program I had heard about DM only but did not know in detail, Now, I felt that it's important one n we should make family disaster plan to village level disaster plan for saving lives, money and enhancing the development.	Excellent	As I am from agriculture department, and as I have learned from the training that, agricultural disaster include drought, hailstorm, unequal rainfall etc. I know how to chalk out the mitigation plan etc. I will include this concept in all types of training for farmers which we will be organize at block or village level . Also, will convey this message to our subordinates or colleagues.	This training program should be a class room training for more clarity. On 9th November we were asked to join at googlemeet and later on on webex. This created somewhat difficulty or could not join in time. After some time I could join the training. But after all this training was really meaningful and useful ..
spahari.47@gmail.com	Excellent	Yes	I am applying this concept to my villagers for preparing them to protect the disasters.	Excellent	I want to share my knowledge to my colleagues and friend also.	This training program is very important to the participants for preparing their villagers to
